

## i.Picasso

Some users just need the best IP phone there is. Some users want to interact with a world of applications, view video feeds, access corporate databases or browse a website on their office phones. Some users need Telrad Connegy's i.Picasso.

An ideal communication device for executives who settle for nothing but the best, bringing almost unlimited possibilities to your desktop phone, i.Picasso is truly one of a kind.

And looks do matter: your desk telephone is part of the image you project. If you want to project innovation, cutting edge technology and an uncompromising attention to design, nothing does it better than the i.Picasso.

### Redefining IP phones

Telrad Connegy's i.Picasso sets the standard for advanced IP telephones. With the platform that it offers, users can finally take full advantage of IP technology and the applications it enables, with all the rich calling features of the system.

Developed with a true vision of what VoIP technology brings when it is stretched to its limits, i.Picasso offers the advanced capabilities of no other IP telephone. With its large, color rich, liquid crystal display, which also doubles as a touch screen, i.Picasso is truly one of a kind.

Whether in the main office or in a remote or home office, i.Picasso functions over any IP network. Connected to AdvanceIP, i.Picasso delivers all the features you expect from a state of the art high-end business telephone, such as Unified Messaging, Advanced Speed Dialing, extension usage indicators, call center connectivity and more.

But this is just the tip of the iceberg: with its integrated HTML capabilities, you can easily configure it to interact with any HTML application.

## A world of Applications

Many ready-to-run applications can immediately be used with the i.Picasso. And for those enterprises with specialized requirements, new applications can be easily added using standard HTML. Here are just a few examples:

- Easy to use company phone directory, complete with color usage indicators
- Connect to the website of your local pizza shop. Ordering lunch was never easier
- Check the news, weather forecast and traffic reports with a touch of your finger
- See your favorite stock quotes in real time on your phone's screen
- Do you have a web security camera? Download the feed directly to the i.Picasso
- Search for people in the yellow pages database. Once you find the person you want to call – you won't need to dial (yes, the i.Picasso is also a phone!)

## Key Features

- 5.7" color touch screen
- High quality, audio rich sound
- Slick, modern design
- Easy to use graphical user interface
- HTML interface for rapid development of custom applications
- A built in Ethernet switch
- Two powering options: Power over LAN, or using an external power supply
